

Soil Removal and Fill Deposit Permit, Bylaw No. 255

Site Inspection

- | | |
|----------|---|
| 1 | The sides of the area of soil removal or fill deposit shall be sloped at an angle of 45 degree or less. |
| 2 | Drainage shall be provided so that the completed works shall not be subject to flooding. |
| 3 | It is the responsibility of the applicant to repair damage to property, municipal boulevard and highway incurred as a result of the work. |
| 4 | If at any stage of the work authorized by the permit, it appears that further work is likely to endanger any public property, street, easements or lane, or is likely to create condition which would endanger the health or safety of person or property, the permit may be revoked. |
